## Cricket Academy Management System Quick User Manual

This short manual explains how to use the application in simple steps. It is made for Admins, Coaches, and academy staff.

|                     |                                                                                               |
|---------------------|-----------------------------------------------------------------------------------------------|
| <b>Application</b>  | Unity Cricket Academy Management System                                                       |
| <b>Users</b>        | Admin and Coach                                                                               |
| <b>Platform</b>     | Angular 17 + Supabase + Vercel                                                                |
| <b>Main Purpose</b> | Manage students, fees, attendance, matches, salaries, tasks, enquiries, and coach performance |

## 1. Login

- ? Open the application URL.
- ? Enter your registered email and password.
- ? Click Sign in.
- ? Admin users see all modules. Coach users see only allowed modules.

## 2. Dashboard

- ? Dashboard shows quick academy numbers like students, coaches, batches, and monthly fees.
- ? Click cards like Students, Coaches, Batches, or Fees to open those pages.
- ? Use it as the daily starting point for academy work.

## 3. Students

- ? Use Students to add, edit, search, filter, deactivate, or reactivate players.
- ? Date of Birth automatically calculates age.
- ? Inactive students do not appear in attendance and fee generation.
- ? Coaches can manage students only from their assigned batches.

## 4. Coaches and Batches

- ? Admin can add coaches, set designation, salary, access, and active status.
- ? Batches are training groups with timing and assigned coach.
- ? Admin can add, edit, and delete batches.

## 5. Attendance

- ? Select date and batch, then mark students Present or Absent.
- ? Saved attendance loads automatically when revisiting the date.
- ? If a student is absent for 3 continuous days, the app shows an alert.
- ? Use Send WhatsApp to follow up with parents directly.

## 6. Fees

- ? Fees page shows Paid Fees and Pending Fees separately.
- ? Admin can see all batches. Coaches see only their assigned batches.
- ? Use Add Fee to record a payment.
- ? Use WhatsApp reminder for students with pending fees.
- ? Download monthly fee PDF reports combined or batch-wise.

## 7. Salaries

- ? Admin can generate monthly coach salary.
- ? System calculates working days, paid leaves, leave deduction, bonus, penalty, advance, and final salary.

? Admin can download salary slips and monthly salary distribution PDF.

? Admin can delete generated salary records if needed.

## 8. Matches

? Create matches with opponent, venue, date, fee, age group, players, coaches, and notes.

? Select players batch-wise and assign roles like Captain, WK, Batsman, Bowler, or All-rounder.

? Track match fee paid/pending for each player.

? Admin can delete matches. Coaches can create and manage match details.

## 9. Enquiries

? Use Enquiries for visitors or players who have not taken admission yet.

? Add player name, mobile number, age/DOB, interested batch, source, interest type, remarks, and status.

? Use Text Message to send WhatsApp follow-up.

? Admin can convert enquiry to student and then select final batch and fee package.

## 10. Staff Tasks

? Admin creates tasks and assigns them to coaches.

? Coaches can view assigned tasks, add comments, update status, and mark completed.

? Admin can approve or reopen completed tasks.

## 11. Coach Performance

? Admin-only module for coach points, rankings, logs, enquiries, and rewards/penalties.

? Scores are created automatically from student growth, attendance, fees, tasks, enquiries, and manual adjustments.

? Monthly snapshots save permanent coach scores and grades.

## User Roles

| Role  | Can Do                                                                                                         |
|-------|----------------------------------------------------------------------------------------------------------------|
| Admin | Full access: students, coaches, batches, attendance, fees, salaries, matches, tasks, enquiries, performance re |
| Coach | Limited access: own batch students, own attendance work, own fee entries, enquiries, matches, and assigned     |

## Daily Quick Workflow

| User  | Simple Daily Flow                                                                                         |
|-------|-----------------------------------------------------------------------------------------------------------|
| Admin | Login -> Check Dashboard -> Manage students/coaches/batches -> Review fees/attendance -> Assign tasks -   |
| Coach | Login -> Check tasks -> Mark attendance -> Add fee/enquiry if needed -> Follow up using WhatsApp -> Updat |

## Common Help

? If login does not work, check email/password and Supabase user confirmation.

? If data is missing, confirm the user role and batch assignment.

? If a new feature does not appear after deployment, hard refresh using Ctrl + Shift + R.

? For database-related features, make sure the latest SQL migration was run in Supabase.

## Summary

Unity Cricket Academy Management System is a complete academy operations application. It helps staff manage students, attendance, fees, salaries, matches, enquiries, tasks, and coach performance from one place. Admin controls the full system, while coaches work only with their allowed data.
